A Day in the Life OF LINCOLN BUTTERFIELD

Burbank-based indie animation house Lincoln Butterfield (co-founded by Robert Hughes and Joseph Walker) took a totally different route with our "Day in the Life" concept. Instead of the usual photo collage routine, they gave us some super-cool drawings of their daily grind, courtesy of talented creative producer Mitch Schauer, who is also the man behind the upcoming new Fantagraphics book *RIP, M.D.* You can learn more about this creative team and their development slate at www.lincolnbutterfield.com.
